WEATHER SYNOPSIS BY REGION

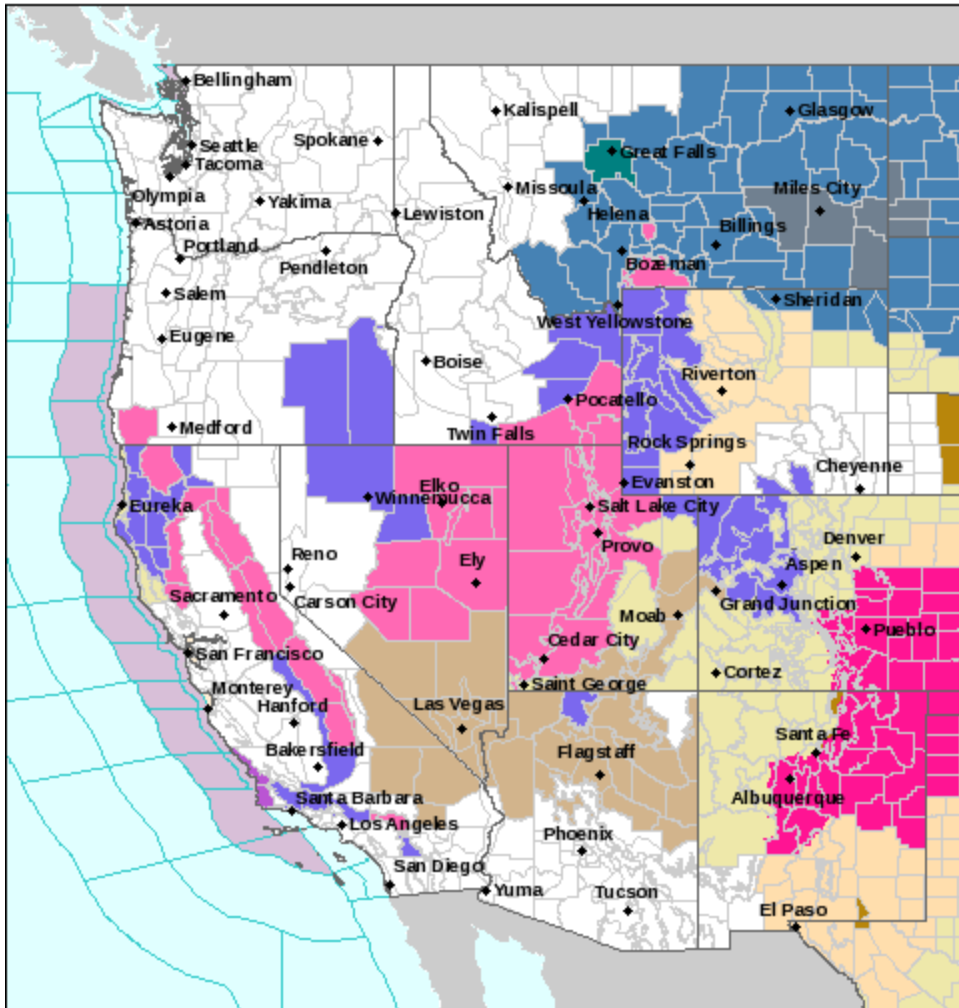

NORTHERN CALIFORNIA

Winter impacts will continue as numerous showers bring snow showers to the region through this evening. Snow levels start out between 1000 and 1500 feet this morning, rise to 2000 to 2500 feet this afternoon, then lowering again to around 1500 feet late this evening. Most of the road snow impacts will be this morning, then again this evening as road and air temperatures fall near or below freezing. Little or no accumulation is expected late this morning and afternoon due to warming air and road temperatures. Gusty south winds are expected again in the Shasta Valley near Weed resulting in blowing snow and limited visibility at times.

SOUTHERN CALIFORNIA

A moist Pacific storm system will continue to bring showers across southwest California through this afternoon. Most areas will see additional light accumulations generally under 0.50 inch.. Mountain snow is likely to occur with heaviest amounts of one foot or more above 7000 feet in Ventura and Los Angeles Counties and lesser amounts down to 5500 feet across most mountain ranges. Winter driving conditions will exist if traveling to resorts and across higher mountain passes. Drier and a little warmer Sunday.
